ABOUT ME

I'm a final year **Computer Science** student at **UMT** with a strong interest in **Cloud Computing, Infrastructure,** and **Cybersecurity**. Alongside this, I also work on **Web and Mobile App Development**, which helps me build complete, real world solutions. I enjoy creating scalable systems and continuously improving my skills through hands on projects and certifications, with a focus on building secure and efficient applications.

PROJECTS

Python Tkinter Encryption App A desktop based Python Tkinter Encryption & Decryption application using Fernet symmetric encryption. The app provides a simple login system, text/file encryption, and secure decryption via a graphical interface.

Link: https://github.com/talha-ghaffar-ch/Python-Tkinter-Encryption-App

Pagri Studio App A mobile first React + Vite digital agency application packaged for Android with Capacitor, featuring an AI powered business assistant (Gemini), service showcase modules, client request workflows, built in legal pages, and PWA support. The project is designed as a production ready, single codebase solution for brand presentation, lead generation, and cross platform deployment.
